

2FA authentication using an authentication app

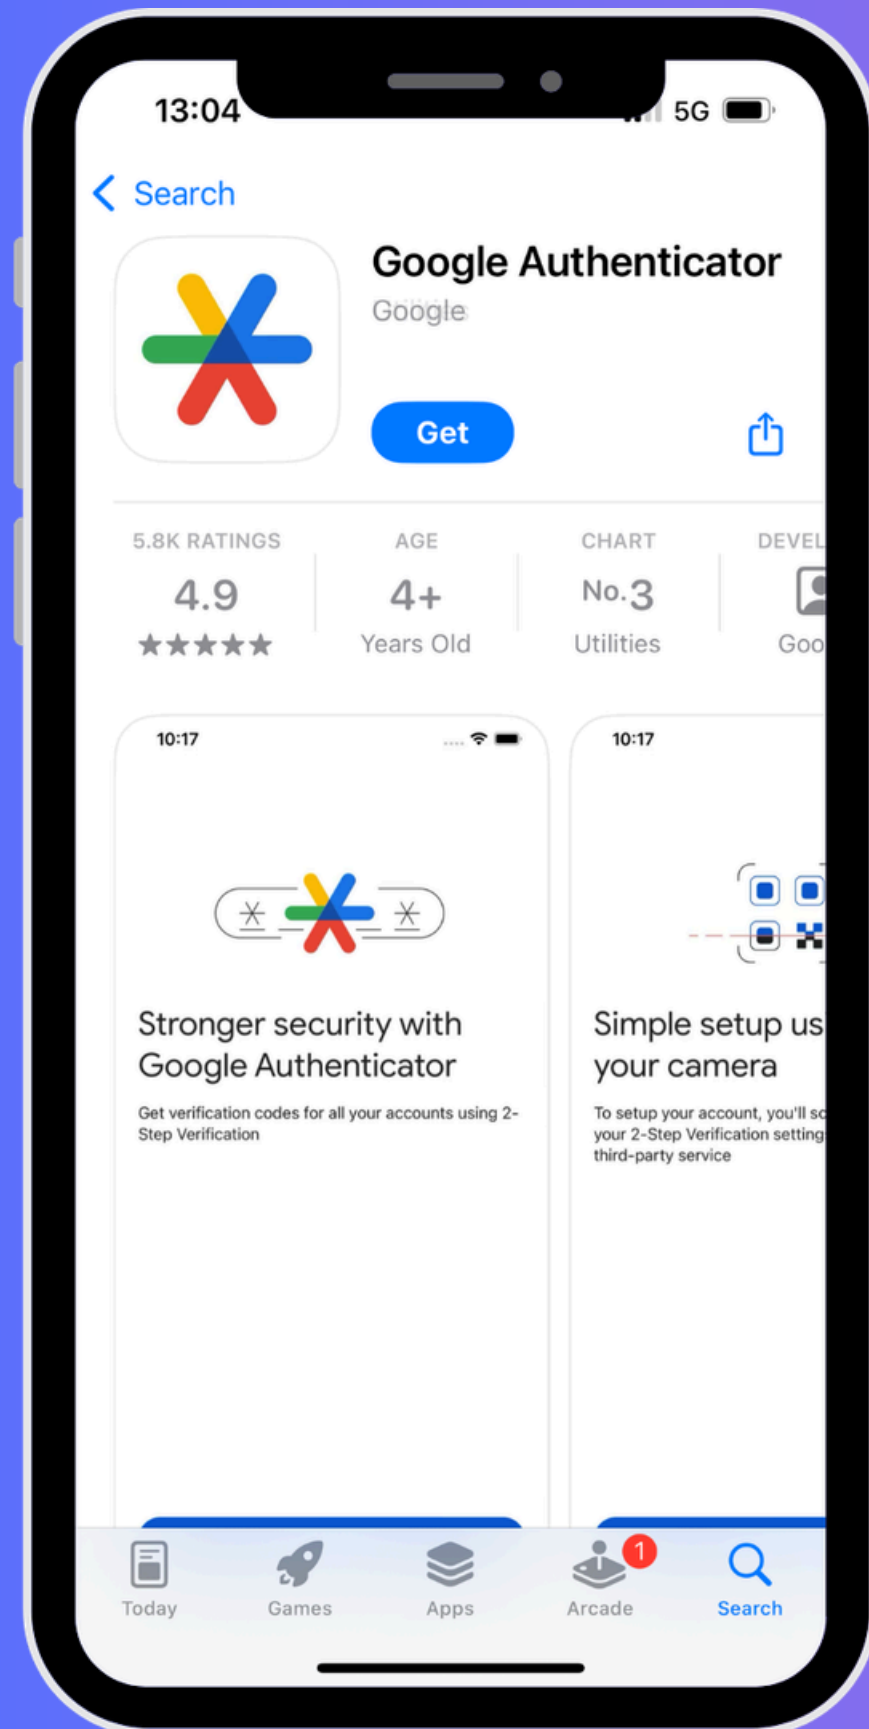

Step 1

After logging in to your PROFITUS account, you will be redirected to 2FA activation.

In the “Password” field, enter your latest PROFITUS account password and click the “Next” button.

In the next step, you will be able to link your account to an authentication app by scanning the QR code or copying the provided key.

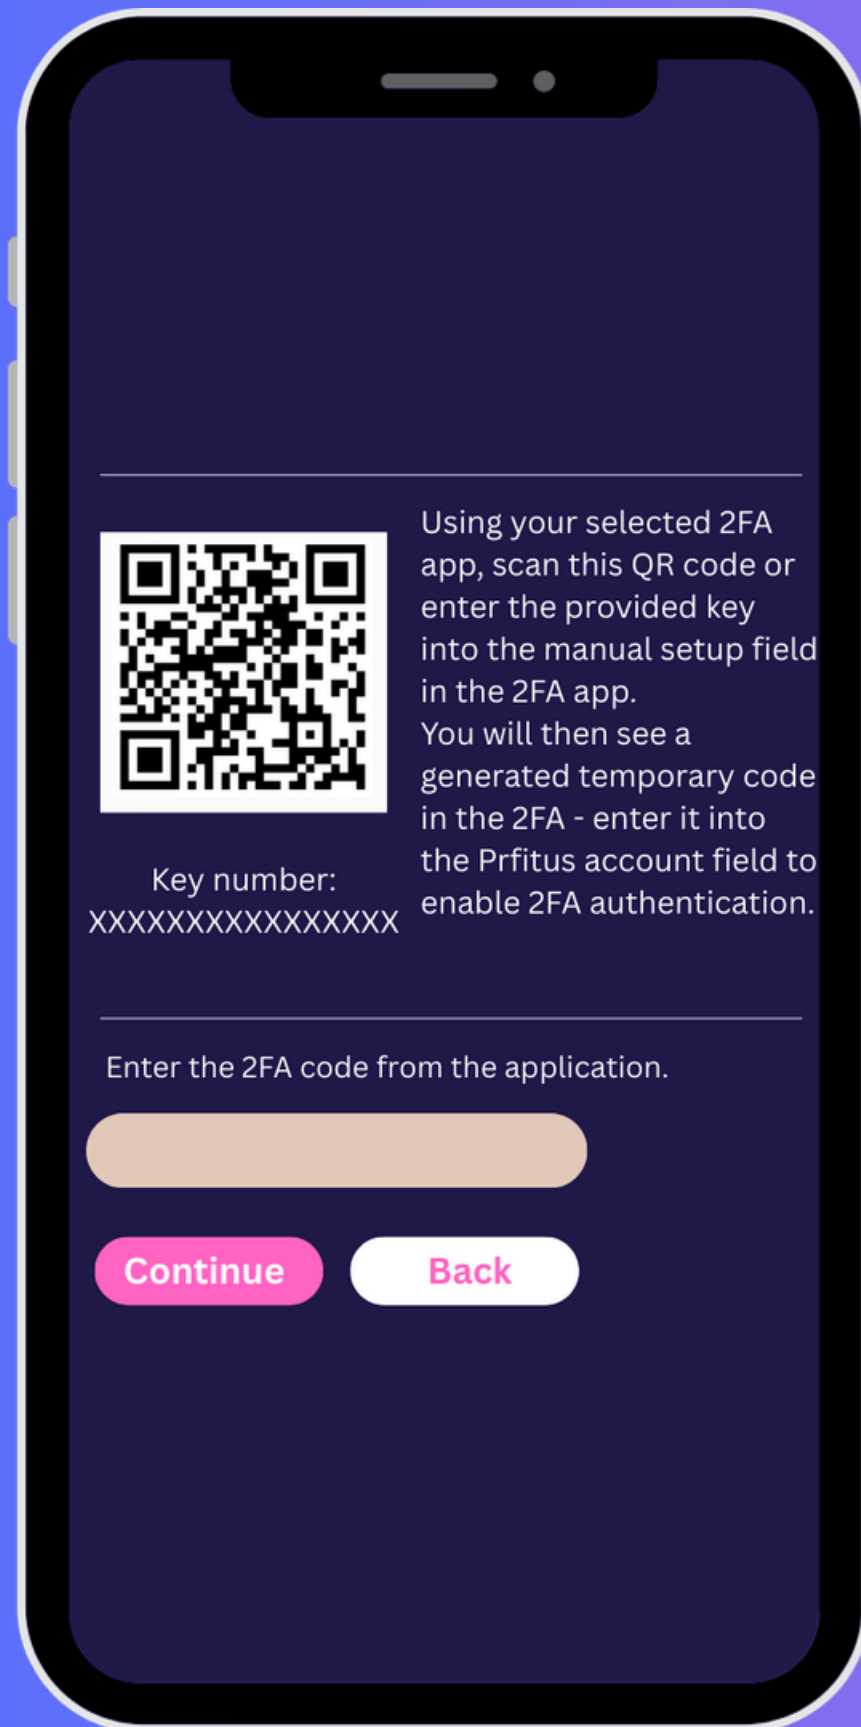

Step 1

Download the app to your device:

Download one of the following apps to your mobile device:

- **Google Authenticator** (recommended; the instructions below demonstrate how to use it);
- **Microsoft Authenticator**;
- **Authy**;

You can find these apps in the „App Store“ or „Google Play“ store.

Step 2

Return to your PROFITUS account

Log in to your account via **browser** or **the PROFITUS mobile app**.

The system will automatically prompt you to activate 2FA.

On the screen, you will see a QR code and a key that you can copy.

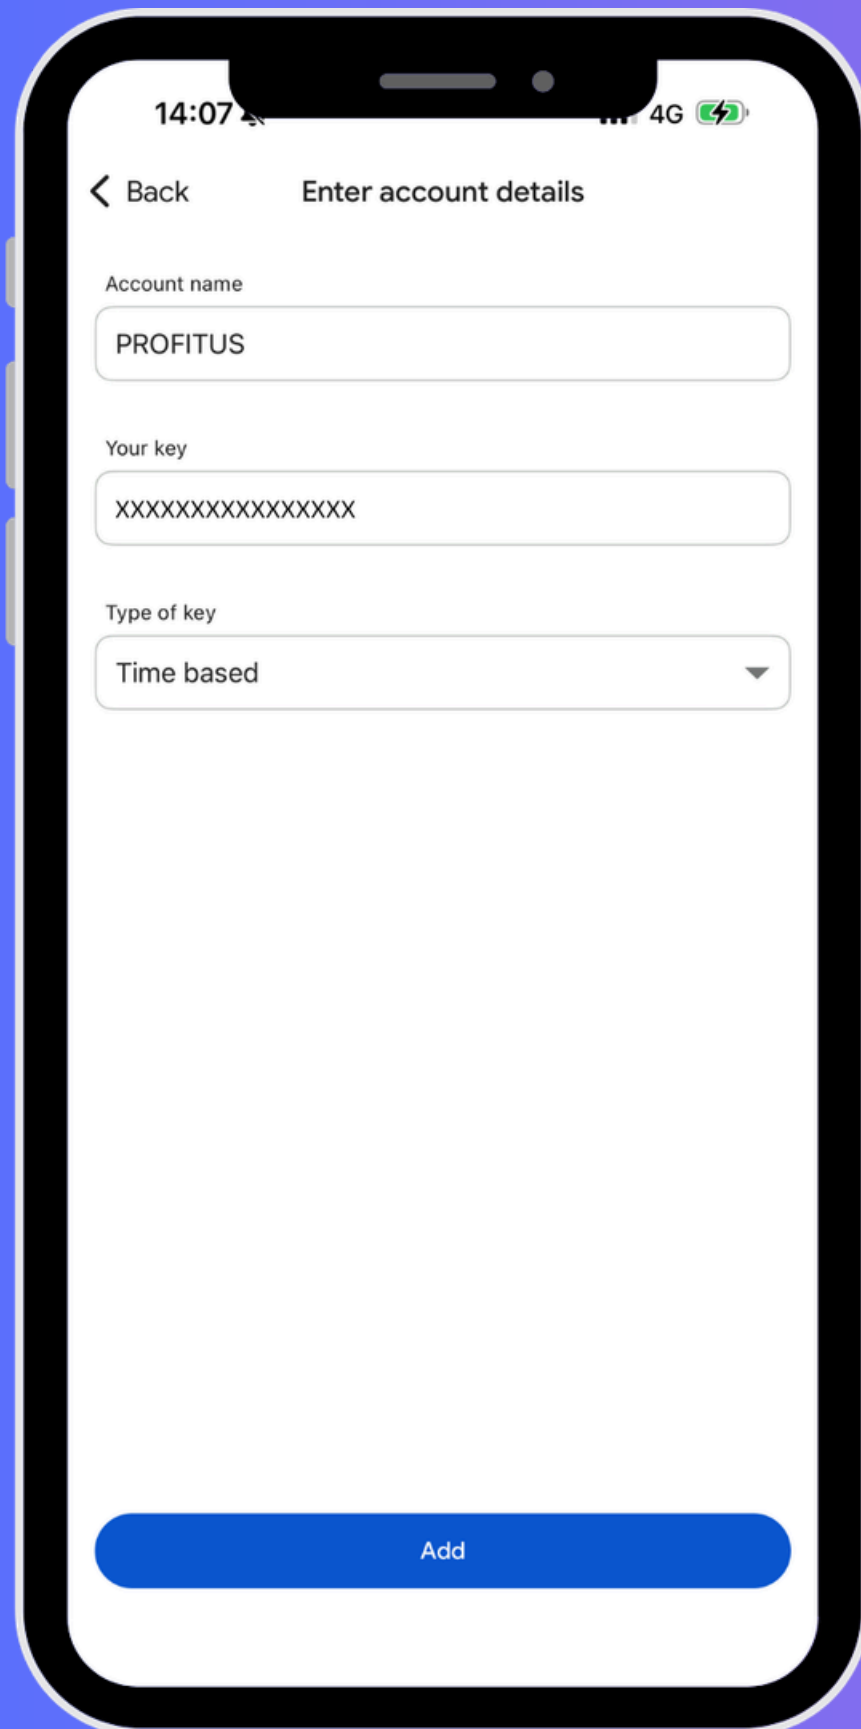

Step 3

Open the downloaded authentication app

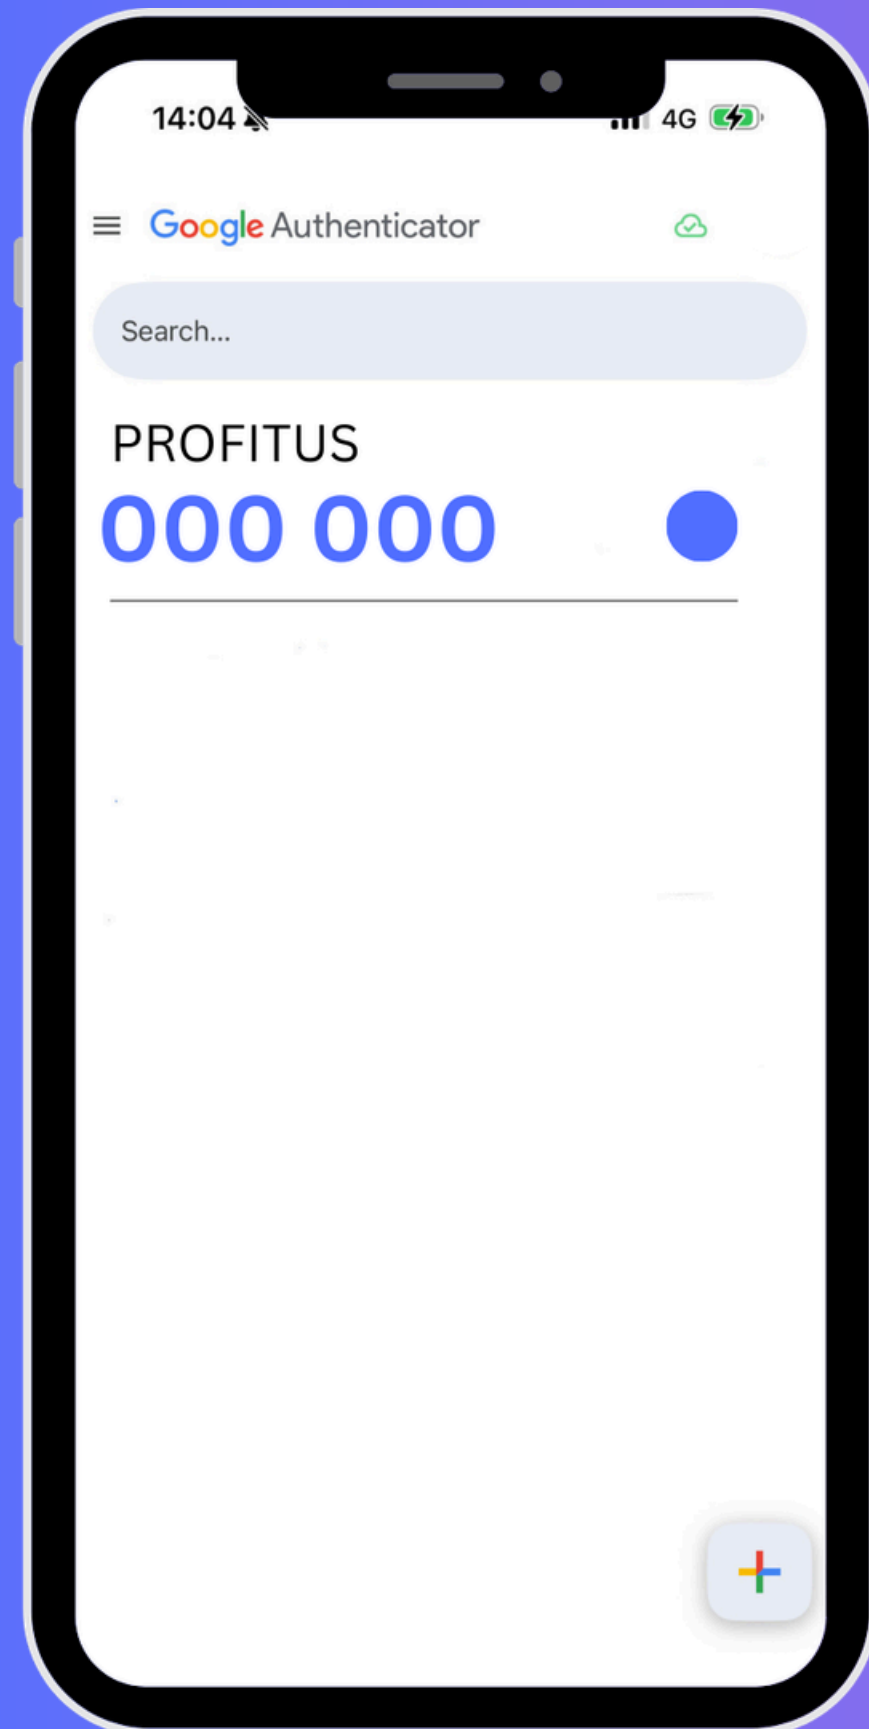

In **Google Authenticator**, tap the “+” symbol and choose:

"Scan a QR code", if you are scanning the QR code displayed on your computer, or **"Enter a setup key"**, if you are unable to scan the QR code using your phone's camera.

Unable to scan the QR code with your phone camera? There is a solution!

If you cannot scan the QR code with your phone camera, in the “**Your key**” field enter the key shown in your PROFITUS account (below the QR code) and manually add the account in the **Google Authenticator** app.

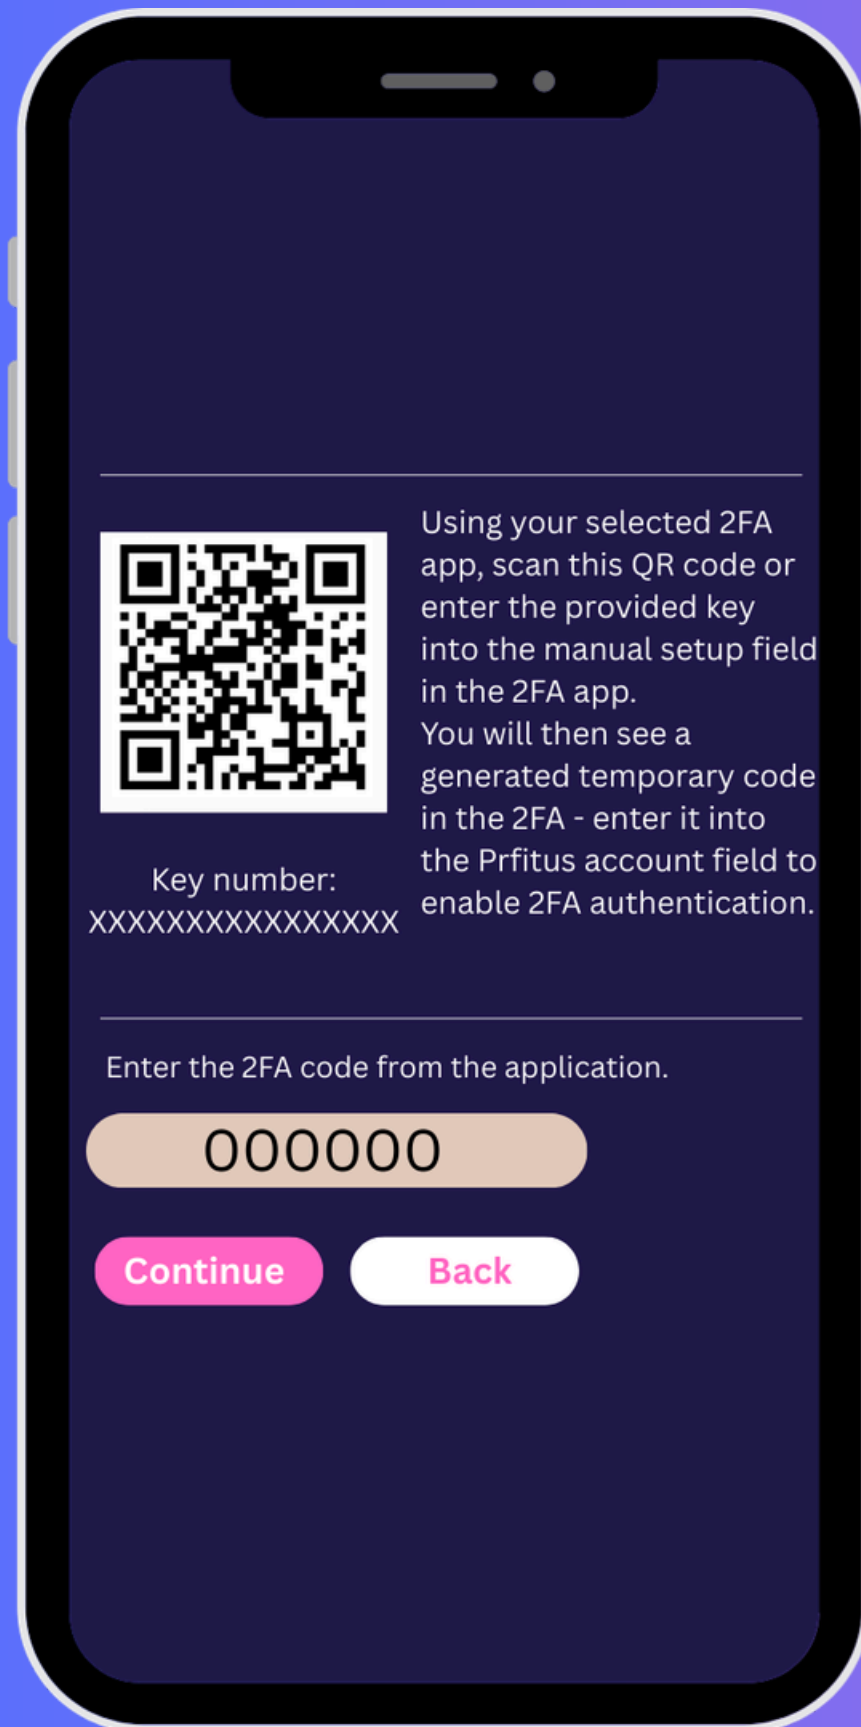

Step 4

Copy the generated code

In the authentication app, you will see a temporary **6-digit code**.

Copy it by tapping on the number combination or by using the copy button on the right-hand side.

***IMPORTANT!** The authentication code is usually valid for **30 seconds** and refreshes automatically.

Step 5

Enter the generated code in your PROFITUS account

Return to your PROFITUS account and enter the copied code in the field **“Enter 2FA from the application.”**

Click the **“Next”** button.

Two factor authentication

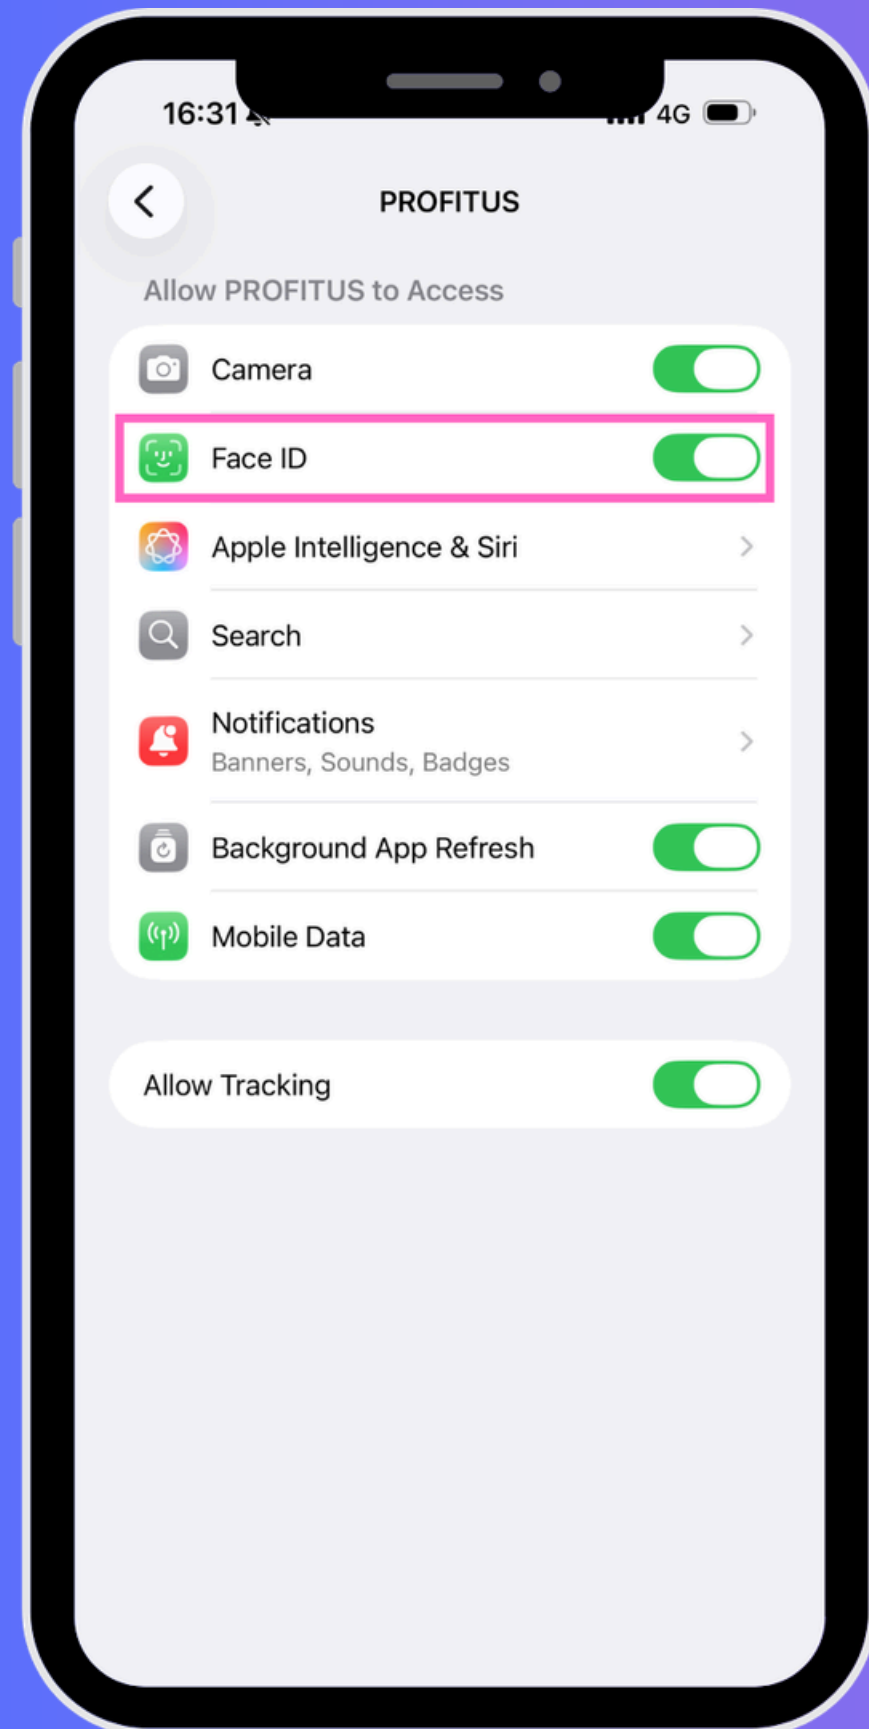

2FA authentication succesfully enabled. Now your account is more secure. From now on, every time you connect to the system, you will be asked to enter the 2FA code.

Done

Congratulations! Your 2FA authentication has been successfully enabled!

From now on, you will need to complete two-factor authentication every time you log in to your account.

PROFITUS

For more convenient use of your PROFITUS account, we recommend downloading the PROFITUS mobile app

Enable biometric login in your mobile device settings. In this case, two-factor authentication will not be required, and you will be able to log in using facial recognition or your fingerprint.

You can download the PROFITUS app from:

- 👉 App store;
- 👉 Google play

IMPORTANT! To use biometric login, make sure to grant the PROFITUS app permission to use FACE ID in your phone settings.
